The Rapidjoint Joinery Connector System

Do you require a labour saving, innovative joining solution for Mason Mitres, Staircase Components, Panels and Bench Tops?

Rapidjoint Joins can be temporary or permanent, with or without glue, and the Rapidjoiner does not require a special tool - just tighten it with the tool that's always nearby - the battery screwdriver. Remember a Phillips Head, Flat Head, Robertson No.2 or 4mm Allan Key will do the job also!

Try Rapidjoint Products!
